

Level 1 Student Writing: Sample A - 'Boat'

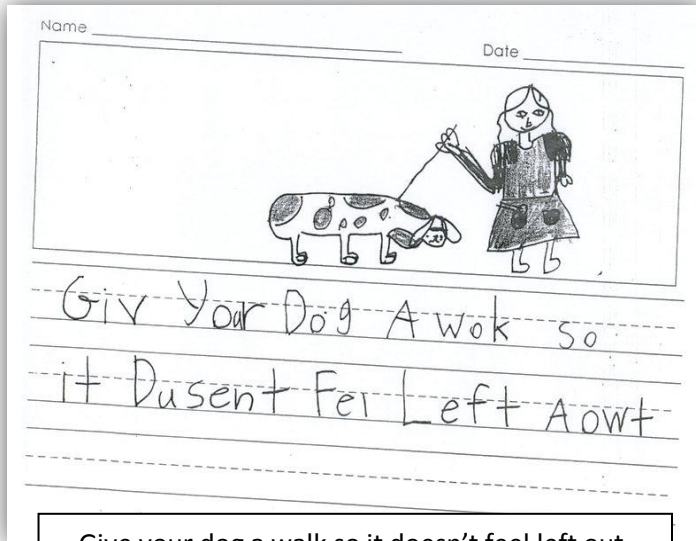

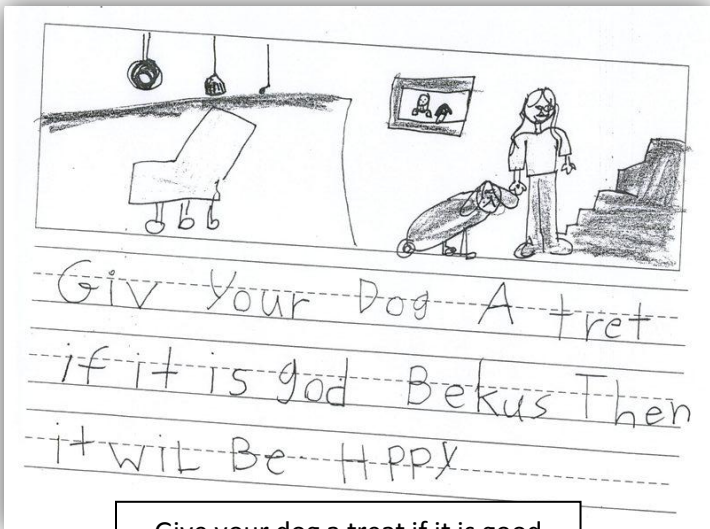

Level 3 Student Writing: Sample A - 'Dogs'

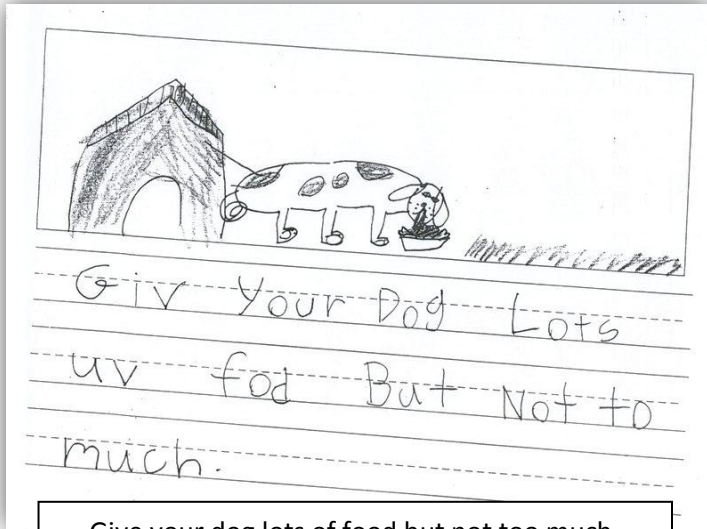

Dogs

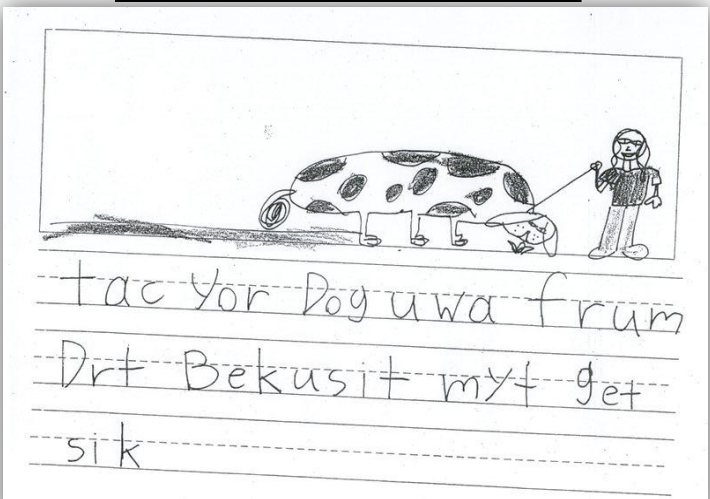

Give your dog a walk so it doesn't feel left out.

Give your dog a treat if it is good because then it will be happy.

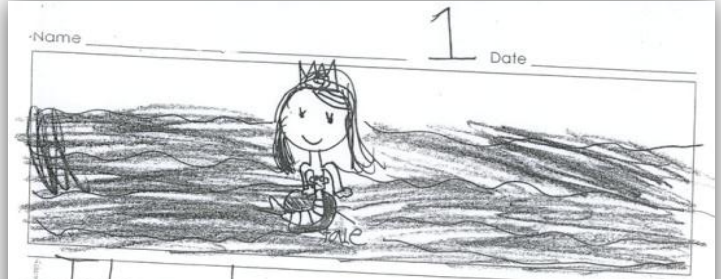

Give your dog lots of food but not too much.

Take your dog away from dirt because it might get sick.

Mermaids

The tale make the
 Mermaids SWIMM RELY fast.
 And slow.

The tail makes the mermaids swim really fast and slow

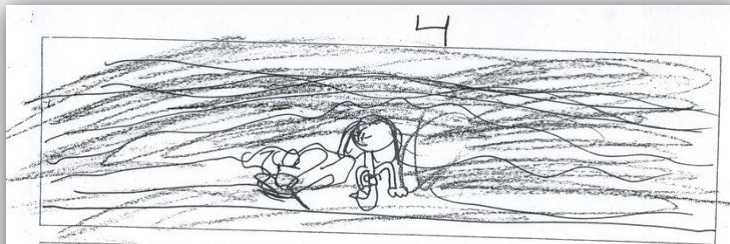

The mirmad hLPS for hLP.
 to clen the oshin and.
 Plat sewd and a Lot of
 Food For animals.

The mermaid helps to clean the ocean and plant seaweed and lot of food for animals

The mrrmas woch the
 animals just in a case.
 The animals @if sick.

The mermaids watch the animals just in case the animals get sick

Mrrmas et sewed All
 the time
 The mrrmas Love sewed.
 And mrrmas hLP animals
 Gt out of sum thid

Mermaids eat seaweed all the time. The mermaids love seaweed and mermaids help animals get out of something

Where to pet your dog. by Nicholas D

They love it what
you pet them under
their ear and
legs.

▭

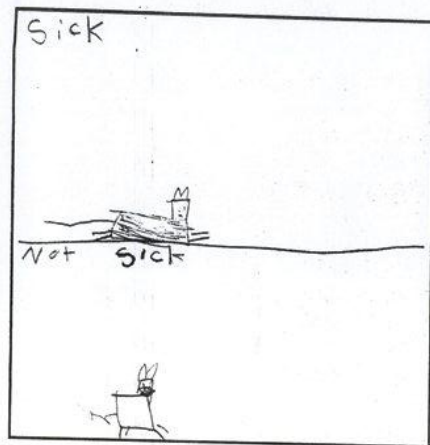

When to feed your dog

Some times feed
your dog in the
Day At 9:00 in ^{the} morning
and At 6:00 At Night.

(2)

Dogs Health!

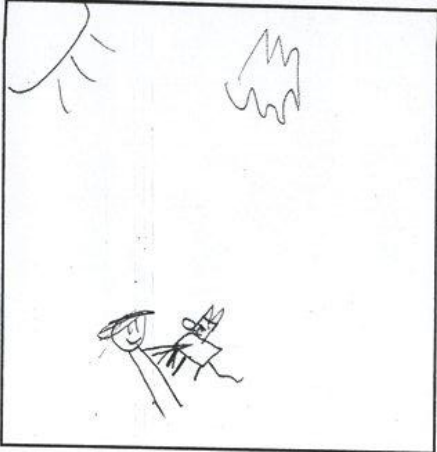

IF your dogs
Nose is wet that
means it is healthy
But if is not
it is sick!

(3)

All about Reading

Do you like Reading
Do you have a
favorite book because
this book will blow
your mind. Will
start with a
balanced reading
diet this reading

tool can help you choose
your books - it will also
help you become a better

Did you know

reader, you can
find book all around
the world, cool
right if you like
me and my sister
all you want
to do is read
and read it fun

to read and talk at the
same time as long as it
about the books.

Don't
cover

Judge a book by it
a book dosint alway
look good on
it cover but
if you take
a look inside
it maybe better
than you ^{think} imagine
if you flip the

page you can take a quiz
so ready not LET'S READ!
come on lets go

Quiz time
circle the one you like best

would you rather
read at
Home the park
the subway, stachain
what do you
like best fiction
no fiction or both
if you could read

any books in the world
what would it be Harry potter
diray of a wimpy kid none
or all of the above

Subways

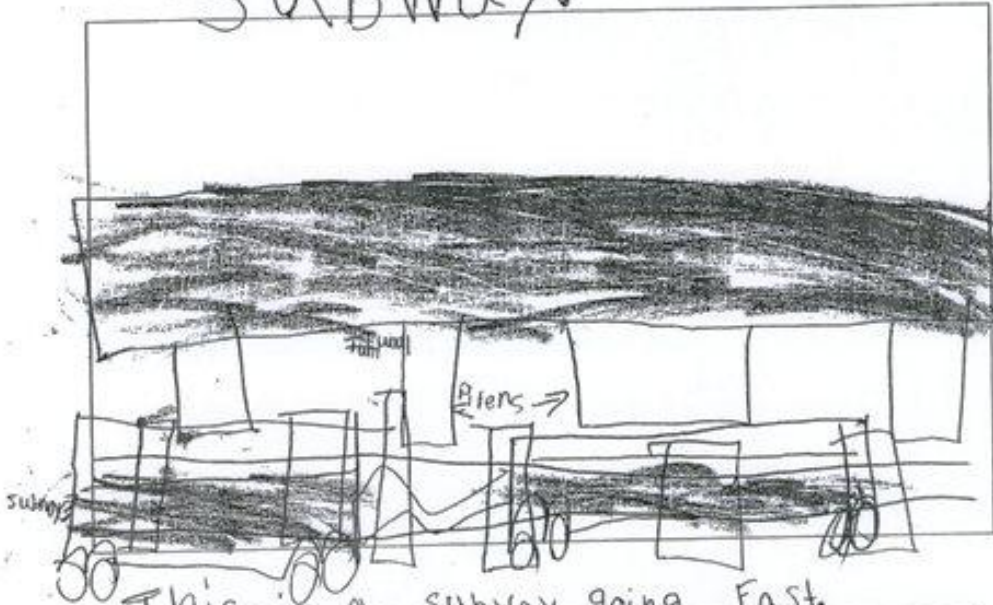

What is a subway? 1

Who works in a subway? 2

When are subways? 3

What makes a subway work? 4

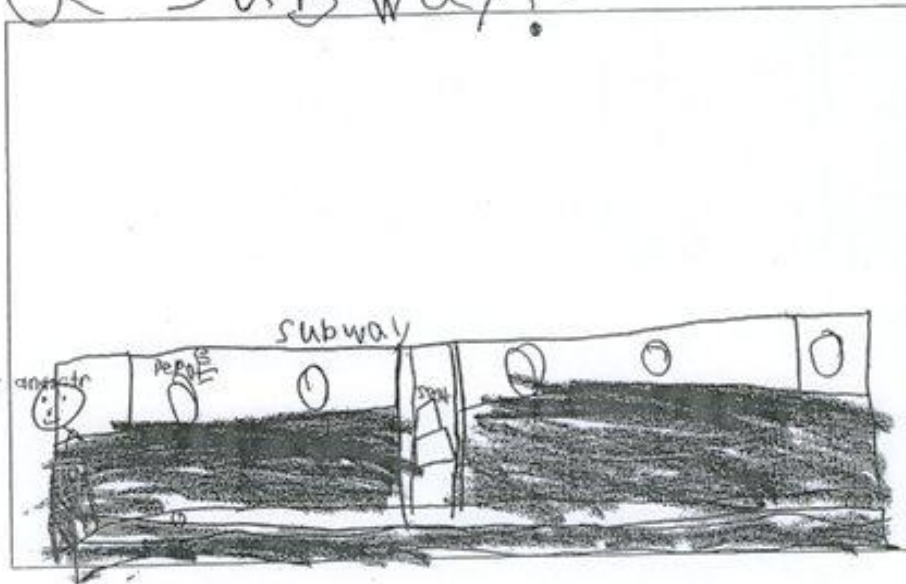

What is a 1
Subway?

This is a subway going fast.

A subway is a fast train that
goes underground. There are different kinds of
subways. Subways have 3 pairs of doors that open
at a station so it's easy for the people to get
in or out. Subways are electric. Subways
are the fastest train underground.

~~chapter~~ Who Works in a Subway? (2)

This is a subway at the station.

lots of people work in the subway, drivers, cleaners,

Track fixers, and ~~conductors~~ ^{conductors}. Drivers drive the

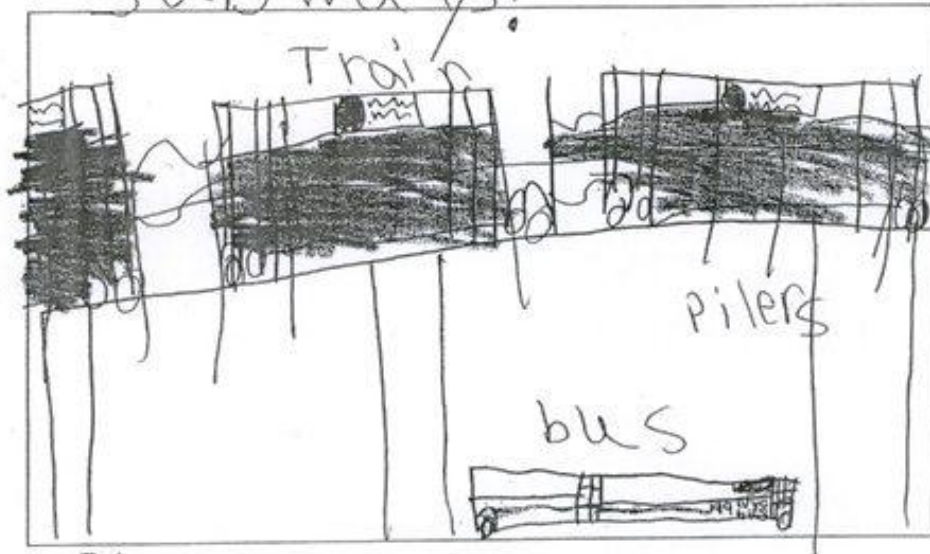

train, cleaners clean the ~~tracks~~ ^{subways} and stations,

Track fixers fix the track, and conductors

open and close the doors.

When are
subways?

3

This is a subway on a bridge over a road.

subways are underground in special

tunnels away from some water pipes and electric

pipes. subways are in cities. They go underground

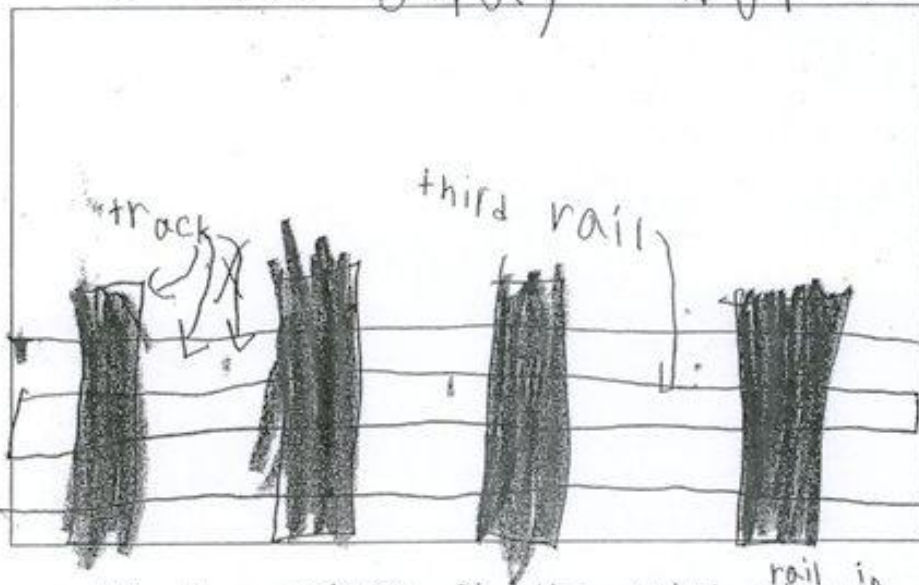

because there is not a lot of

space for the subway to go. The only

time subways go outside is on bridges or a little down than the cars and buses and trucks like the ① and ②.

what makes
a subway work?

(4)

this is a picture of the third rail in
the middle of the track.

A subway works with cable. There is

a special rod thing on the track

The third rail has the most

power. If some one falls on the

rail they die. When some one falls on the

rail some one turns on the cable.

And dont run in the
subway.

★ Plants and Flowers ★

I'm an expert on flowers and I learned that there are different kinds of flowers and some flower and plants are poison and some plants can kill you like a cat is a cat it can rock you and make you bleed so don't go near it some plant can make you itch like a poison ivy plant that can make you itch for like an hour

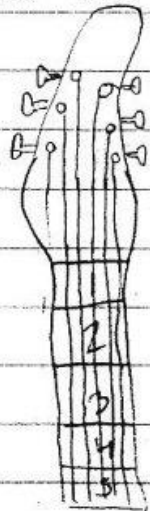

but other plants don't kill you or make you itch as long as you stay away from them and plants can grow on rocks. And if you pull a plant that is so not kind and don't pull any plant because if you were a plant I bet you wouldn't like it if some one pulled your arm

Guitar

PP1 I love music and when I hear a really good song I try to imitate it on my guitar and when I figure out the song I can play it over and over again, that's how I usually learn songs. I had a guitar teacher and she taught me one song and after I learned that song I launched off from there. When I couldn't have lessons anymore I still loved to play guitar so that's how it all started for me and guitar. If you ask me anything about guitar I would have the answer.

PP2 I am an addict when it comes to guitar. I could play all day if I was able to. When I had a teacher the first thing I learned was the names of the strings: Low E, A, G, b, F, high E.

PP3 The second thing I learned about was frets. Frets are one of the most important things in guitar. The higher the number of the fret the higher the note will be.

P4 Once you combine all three of those things you could play any song any time even if you make up your own song one day, and remember if you ever decide to learn to play guitar it is the funnest instrument you'll ever play!

Rattle Snakes

9/21/10

I know several facts about rattlesnakes. Here are a few of them. This has everything you need to know about them.

One fact is that rattlesnakes lay their eggs under rocks and boulders. They do this so other types of snakes don't find their eggs and eat them. They keep their eggs there until they hatch and learn how to defend themselves.

Another fact about rattlesnakes is they don't use their rattle for bringing in food and catching it. They actually use it for scaring away predators. The rattlesnake also uses it to intimidate the predator. In other words, the rattlesnake doesn't get caught by predators often.

The rattlesnake is a very interesting animal. It has many, many more facts too.

Soccer used to be just a little exercise but you can tell it has definitely grown through the years. Let me tell you its history. It all started five centureys ago in China. Now it has developed into a worldwide sport. The most well known cup in the world is the World Cup. Every Country has a league to compete for some sort of cup.

The idea of soccer was first started in China. It was used as a military exercise about five centureys ago. After a while the exercise had evolved into a well known sport. If you really think about it, it has a great story behind it. And that was the beginning of the sport we call soccer.

Soccer is a sport that is watched anywhere you go. But nobody will ever miss the World cup. The World Cup is the biggest tournament in the world. All the international teams try to qualify for it. Some teams are lucky but others are not. Once a number of teams have qualified they go on a journey to try and win the cup. It's a long process but it's definitely worth it.

Every country has a league with national teams. Kids have leagues, grown ups have leagues, everyone who has a team should have a league. Teams in leagues also

have to try and win a cup but this time you don't have to qualify. Almost all soccer players say that soccer isn't just about winning, it's also about having fun. They are absolutely right.

What I love about soccer is watching myself grow through every game and practice. But I also love it because I build my self confidence. Soccer will never die in my thoughts. Who knows, maybe yours too.

Cheetas are amazing animals. They are fast, swift, sleek, and are very good at catching pray. This animal amazes hundreds of people by its amazing talents

Cheetas have very keen eyes. They can see animals from a far distance away. If they see an animal running off in the distance they will be after that animal in a blink of an eye. Cheetas are not just good at seeing things but they are also good at hearing things too. If they hear you tip toeing a few feet away they could probably just hear you.

Cheetas fur are great at camouflaging themselves. Their brownish yellow fur helps them cam. flouge against rocks or sand. Also their black spots help camofloug them in the darkness.

Cheetas fur is another way cheetas catch their pray so well. Another way cheetas catch their pray is their extreme speed that only lasts for a little while. Cheetas are the fastest land animal to live. They are so fast by putting their back legs in front of their front legs, then they push off with their hind legs that are now in the front of their body. Cheetas top speed is faster than a car on a highway, it is 70 miles per hour.

Cheetas are amazing animals but, they might become extinct. Cheetas

and many other animals need our help to save them from we started. Scientist and many other people have been helping save some of the animals, if it were not for them we might never hear those animals again. So, try to help save animals and make a difference, it will really help,

Space is vast. It may be brimming with life or it may be desolate, dangerous, and lonely. We may never know but, as Carl Sagan once said, "Extraordinary claims require extraordinary evidence." Evidence suggests that life would be difficult due to many dangerous objects in space. Despite this evidence, there is a huge argument over the possibility of extraterrestrial life in the universe. But we may resolve this argument soon, because scientists are researching new technology to find these hidden E.T.s.

Space is full of dangerous objects. Black holes are incredibly dense objects. They are formed when a large star explodes. If you were able to survive the crush of a black hole, you would start to experience time slowing down. The area in which this happens is called an "event horizon." But if you couldn't survive, you would die an incredibly painful and gruesome death.

There is an everlasting argument because of this question "Are we alone in the universe?" Less than half of the United States' population says yes. According to the Drake Equation we have galactic company. But two ways to think about this are (a) The universe is so vast, there are definitely other life forms out there, or (b) life is a mistake.

Scientists use different tools to search for extraterrestrial life. One tool is the radio telescope. It can receive and transmit messages. When you watch T.V., some of the signals

go off into space. You can send messages with your T.V.

I know. Space is a mind boggling thing. And those are just the basics, but we need to be prepared. For if a war-like race comes, we must fight back, not stare in disbelief as they destroy everything.

In 1770 British soldiers killed five American colonists in the "Boston Massacre." Paul Revere, a well known patriot and silversmith created an etching of the massacre showing British soldiers shooting into a crowd of angry colonists. Paul Revere did not show a true representation but this etching was one of the events that helped start the revolution. There are a few other events that helped start the revolution. The British were treating the colonists wrong. King George was taxing the colonists in North America. England had just finished fighting the French & Indian war. The war left England weak and poor. England decided to tax the colonists. Every legal document that the colonists got must have a stamp purchased from the British. The cost of the stamp act was small but the colonists were not mad at the cost they were mad about taxation without representation. The colonists had no say in the taxing by England. This particular series of taxing was called the Stamp Act. The colonists were angry. A group of colonists called the Sons of Liberty in 1773 dressed up like

Native Americans and set off to Griffin's Wharf. There in Griffin's Wharf a cargo of tea awaited them. The Sons of Liberty broke 342 chests of tea and threw the chests into the water. The Sons of Liberty did this because they disagreed with England. They Patriots in Boston thought it was unfair that only one company was allowed to sell tea. They were also angry that England kept the high tax on tea. This event called the "Boston Tea Party" help start the war.

After the Sons of Liberty threw tea chests in the water protesting taxation without representation King George turned furious. King George created the Quartering Act to punish the colonists. The Quartering Act states that the colonists had to house British soldiers if they asked. Colonists also had to supply free barracks, apple cider, food, and cooking utensils and firewood. Colonists had to provide bedding for a soldier and the British troops were allowed to stay in all inns, alehouses and unoccupied building. King George has just made the colonists furious.

In 1775, the Battle of Lexington and Concord happened. Patriots then

started started other battles.
Finally after the revolutionary war
was over, England let go of the
13 colonies. The colonies became
their own country, our home America.
Even though Paul Revere's etching
didn't show a true event, it influenced
the colonists to fight for freedom.

The Patriots were people who lived in the 13 colonies and wanted to separate from England. This essay is about why the Patriots wanted to separate from England and what things the British did to the patriots to make them angrier at the British.

The Patriots wanted to separate from England. One reason why they wanted to separate from England is because of King George's taxes, like tea taxes, for example. To show that they didn't like the tea taxes, a group of patriots called the Sons of Liberty dressed up as Native Americans and dumped tea into the Boston Harbor in 1773. This was called the Boston Tea Party.

Also, the Quartering Act was one of the reasons why the Patriots wanted to separate from England. When people from Boston dumped tea into the Boston Harbor, King George III got

really mad and punished the colonies.

They didn't mind paying taxes as long as they would get something back. But they didn't. That was a reason why the Patriots wanted to separate from England. This was called taxation without representation.

The Stamp Act was another reason why they wanted to separate from England. The Stamp Act was when the British made people pay taxes for every printed paper that they used or had. (licences, ship's papers, playing cards) It wasn't a big cost, but it made the colonists angry anyway.

Another reason why Patriots wanted to separate from England is because of the Boston Massacre. During the Boston Massacre, a crowd of colonists started to throw snowballs at British soldiers. Somebody shouted "Fire!" and the

British soldiers began to shoot into the crowd. They killed 5 people and wounded 6. Paul Revere etched a drawing of the Boston Massacre but etched a not accurate picture. He made the British look a lot worse than they really were.

I think that if the King wouldn't do all of the things he did and he wouldn't make them pay taxes, the British wouldn't be so bad. But since he was not like that, I think it is good that we separated from England.
